DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trovinger #18583 in view of Shingo #561 as discussed in paragraph 4 of the last office action. Regarding claim 18, the modified invention shows two folding rollers 232 in Trovinger attached to each other wherein the folding rollers and modified folding blade have a major axis in a first direction. Regarding the axis of the blade passing the plane as claimed, the examiner notes that recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus if the prior art apparatus teaches all the structural limitations of the claims. See *ex parte Masham*, 2 USPQ 2d 1647 (Bd. Pat. Appl. Inter. 1987) and MPEP 2114.
2. Applicant's arguments filed 4/21/2003 have been fully considered but they are not persuasive.

In response to applicant's argument that the references can not be combined, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by

Art Unit: 3721

combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the secondary reference Shingo discloses that a rounded edge is being used to produce a crease that would not injure the workpiece. Shingo also discloses in col 1 lines 40+ a prior art device that uses a triangle plate 7 to aid in forming a fold which Shingo provides improvements over. Therefore, it would have been obvious to one of ordinary skill in the art to substitute the folding blade of Trovinger with the rounded edge of Shingo to provide for a crease that would not hurt the workpiece.

Regarding new claim 18, see supra.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
